

What are the main services of our Hospitality Solution

The Hospitality Solution brings a fantastic new opportunity to the hotel sector to generate substantial profits while providing hotel guests with more comfort and an everincreasing range of inroom services.

TV Channels & Radio

The Hospitality Solution serves as a mediator that brings TV programs from local cable operators, terrestrial and satellite receivers into your hotel rooms. IPTV technology provides with a far greater capacity and quality of TV and video channels available compared to more traditional analogue TV. VOD – Video On Demand and Juke Box
VOD gives your guests access to movies 24 hours per day. The viewing of these movies can be made payable. The income is divided between the hotel and the distributor.

Internet, messaging & email

With The Hospitality Solution, guests can browse the Internet and receive or send e-mail messages. The technology offers complete control over websites accessibility; you can give your guests full access to all websites or you can limit the access to just a few of them. The solution also gives your guests the possibility to simply connect their laptop to the Internet. You can also charge for this service. To simplify the e-mail service we can also offer a wireless keyboard.

Information portal & News

You can offer all kind of information to your guests through the information portal. The administration is so simple that it can be done by anyone with basic computer knowledge. Using the portal, you can publish essential hotel information, current news, promote entertainment or additional hotel services. At the same time the portal gives you the possibility to make profit from advertising other clients or services. The portal can be connected to the information that is automatically updated over the Internet (weather forecast, traffic and other local information, etc.).

View bill system, express checkout, set wakeup system and welcome screen

The Hospitality solution can be connected to hotel's information system. Guests can view their account balances and be up-to-date with their expenditure. Give your guests a warm welcome message displayed on the TV when they enter the room. Guests can set their wake-up times on the TV screen as well.

Order & Shopping

Order & Shopping offers you the possibility to expose your additional products and services to your guests, such as souvenirs, room-service, hotel services, for example spa or travel arrangements, and other. Catalogue based view allows you to present to your guests all the information about each catalogue item, including the information about where and how to purchase or reserve it.

Games & Fun

Guests can also have fun choosing between several games provided by our solution. Transform your hotelroom in a gameroom! A recognizable diversity of entertainment and communication services of Nevron Hospitality Solution turns a hotel room into a firstrate virtual experience.

Give more
than your guests expect

When business becomes fun

Nevron Hospitality Solution is a lot more than just a movie or a TV program channel. It enables an extensive selection of interactive services that are necessary for increasing the satisfaction of guests, making profit and lowering operational expenses. A fast, reliable and innovative system brings entertainment, communication and information in one, easy to use package. Using direct marketing for hotel's additional services you can increase the sale of these services by 20 to 60 per cent (source: POPAI).

Nevron IPTV

has developed a firstclass hospitality solution in order to satisfy the guests' expectations and needs.

Nevron Hospitality Solution to increase the comfort of your guests

Present hotel business environment is increasingly competitive and hoteliers need to discover new ways of improving guest satisfaction. Being different from others and offering more for the same price is becoming one of the key advantages of hospitality industry.

Even more demanding guests will want to have personalised experiences built around them. The hotel industry recognises that it must go further in approaching their needs and expectations. Hotels are now challenged with maintaining high standards and meeting the new expectations of their guests, they are challenged to capture and offer more information & entertainment along with fast access to it.

As we are familiar with current situation and because of our new technology, Nevron IPTV has developed a firstclass hospitality solution in order to satisfy the guests' expectations and needs, bringing entertainment on demand, communication and information services directly to their hotel room.

Why should you upgrade your Hotel TV System with Nevron Hospitality Solution?

IPTV based Nevron Hospitality Solution provides guests with a totally new experience of staying in your hotel. Hospitality sector is one of the main beneficiaries of the advances that have been made in delivery of TV and other services over (IP) Internet Protocol.

Based on our solution a **vast number of interactive TV services** and digital content over an IP network is brought to all of your hotel rooms at the same time.

As ethernet networks are now a standard requirement in hotels, this **same network can be used** to deliver both digital satellite and terrestrial channels directly to TV's anywhere within your hotel with a number of additional IPTV services which are presented in this brochure.

Nevron IPTV

"An amazing new experience for your guests"

Nevron Hospitality Solution allows **easy and cost effective upgrade** of your existing network, even without the disruption and new costs of installing new cabling for each room. This also **significantly reduces your maintenance cost** of the whole IP network.

To further **minimise support requirements**, the management interface represents a simple PC-based solution.

ALL-IN-ONE! Together with our reliable partners we provide you with **all-in-one** solution, which includes all needed software, hardware, content, maintenance and other services in order to satisfy your custom needs.
